

To overcome the issues in Normal Nutritional Analyzer and Calorie Monitoring Apps.

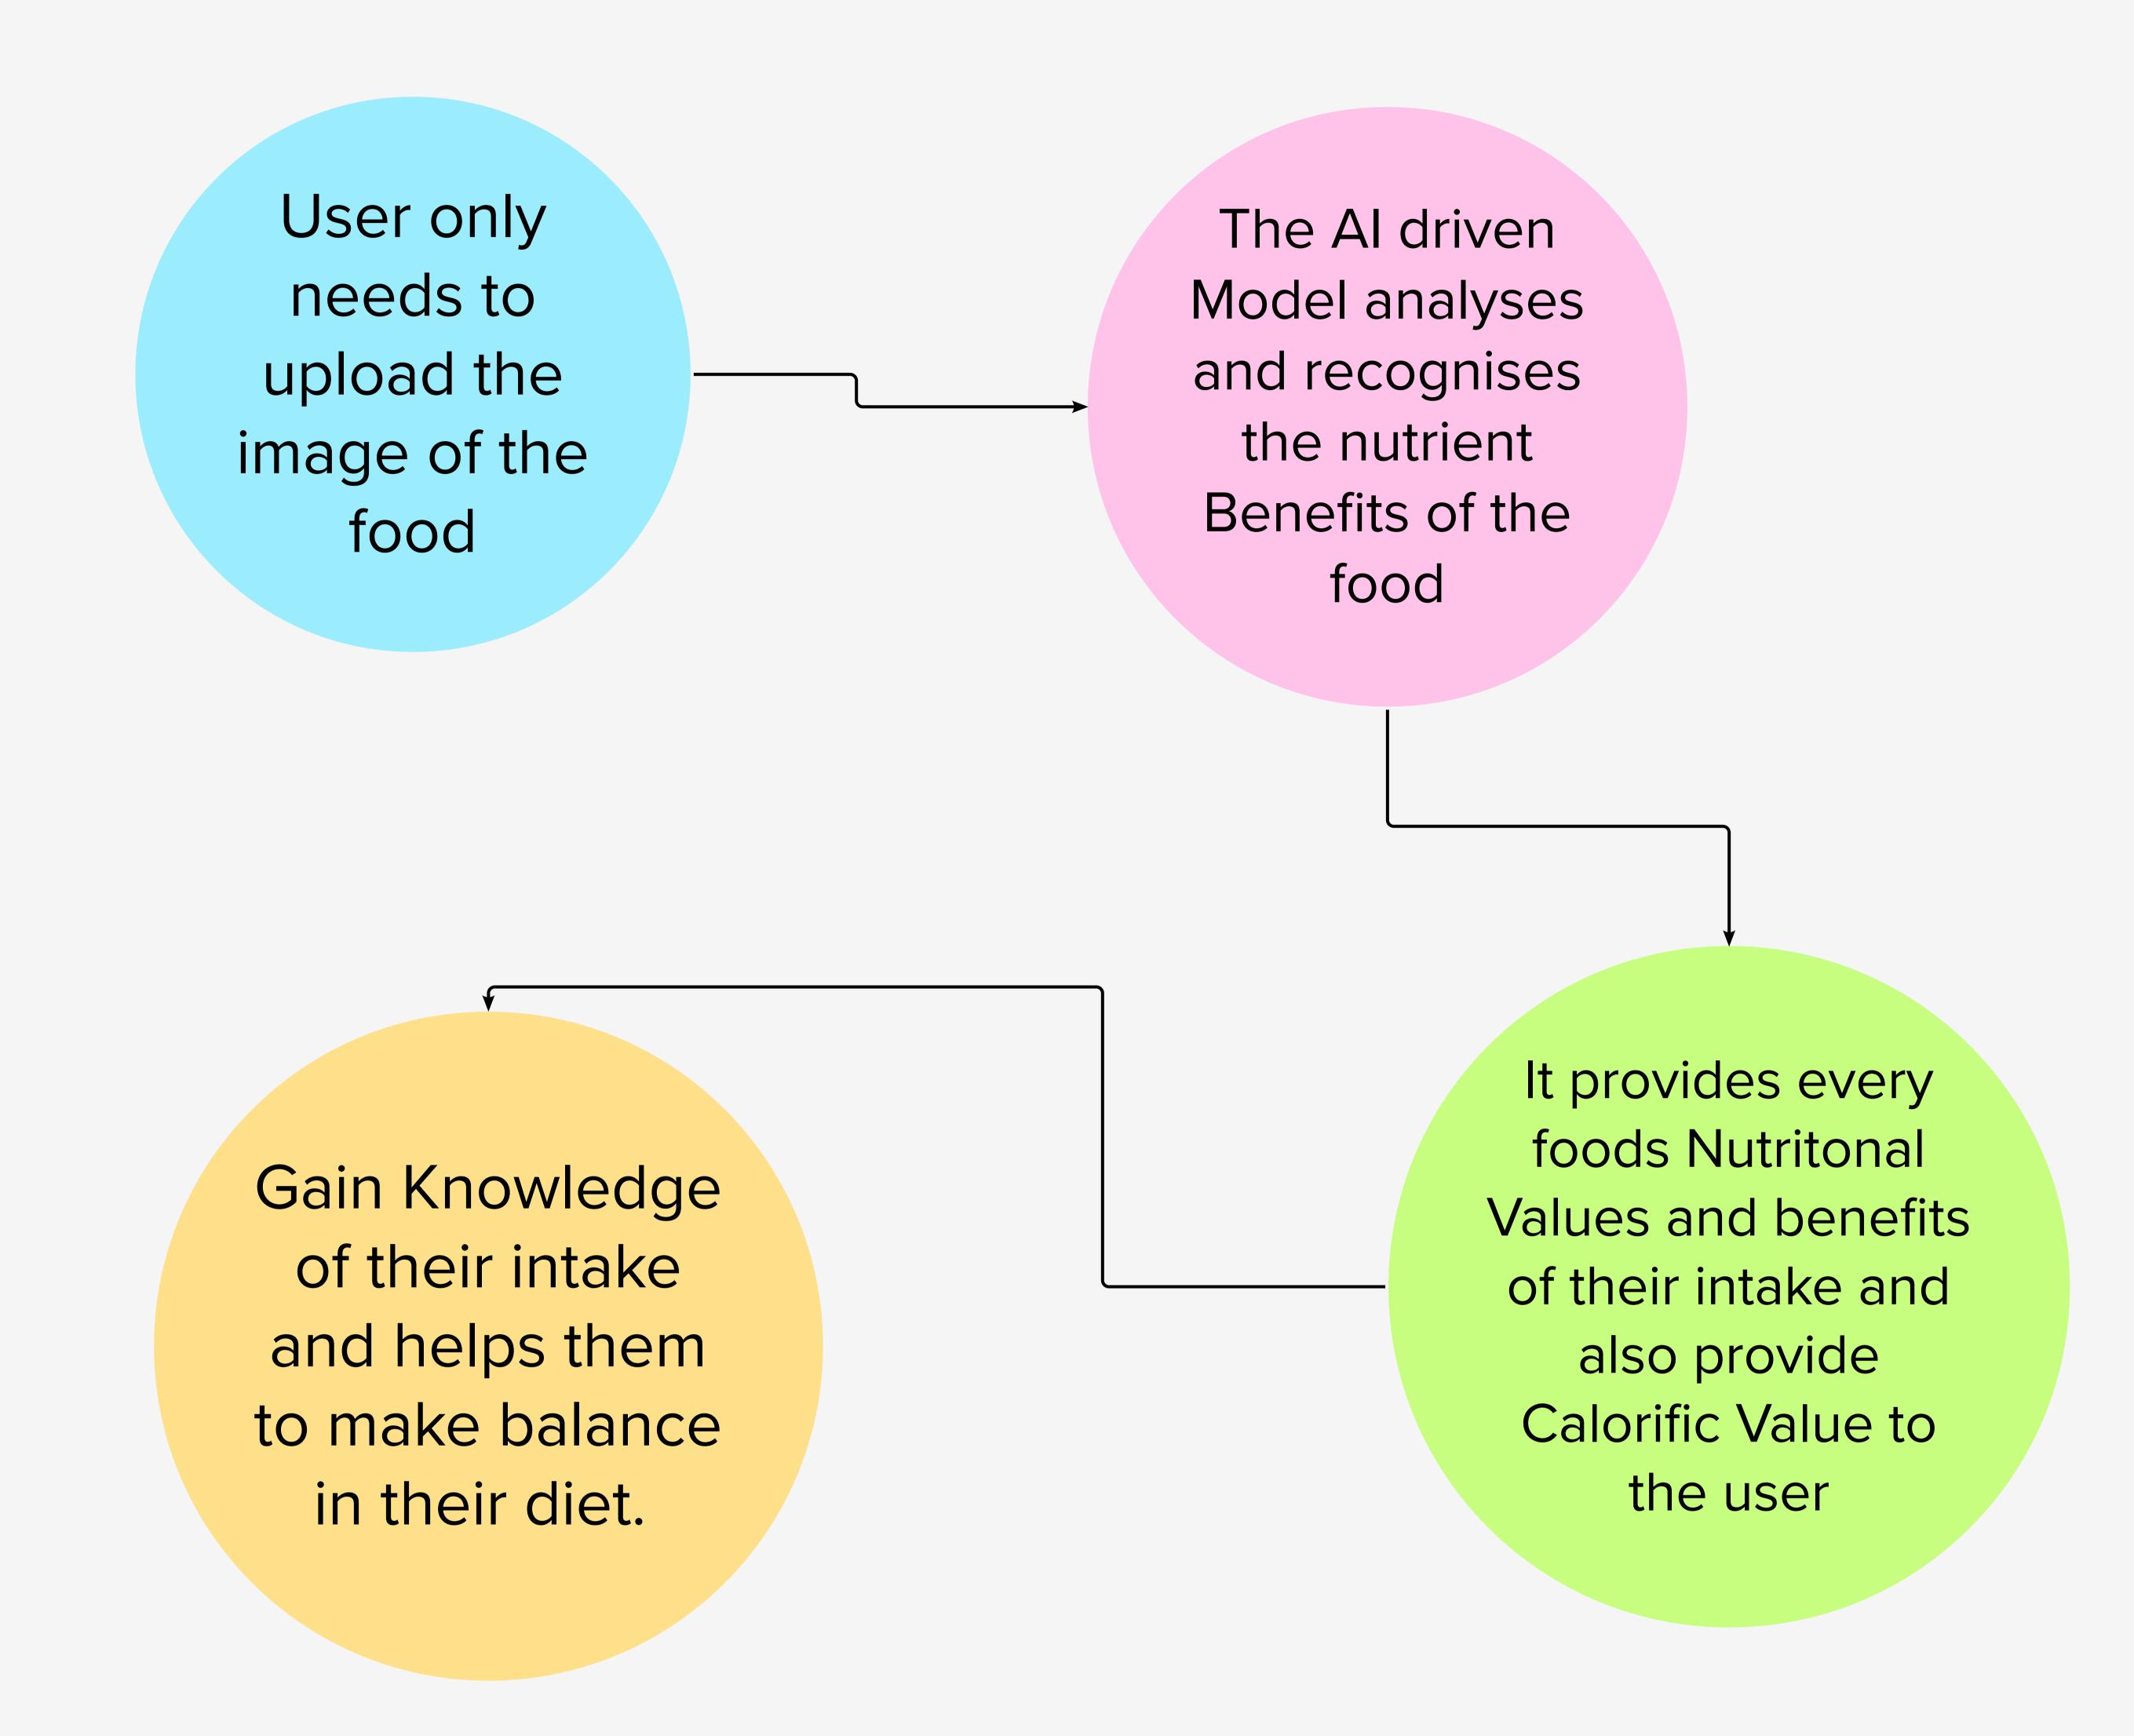

## Group Ideas:

Building the Nutrition
Assistant Application
using Clarifai's Al
Driven Food Model

Providing Nutrients contents by loading the Food Image in the Al Model

The Model recognizes the food in the image and trace the nutritional Values

- 1. Help make life easier for individuals who need to track their food intake for health reasons
- 2. These apps can also help people find restaurants that are suitable for their dietary needs.
